EDUCATION

Jadavpur University

Bachelor of Engineering in Information Technology CGPA: 9.14

Kolkata, India

Oct 2023 – Apr 2027

EXPERIENCE

Your Brand Mate

SDE Intern

- Building product features and backend integrations across a hybrid engineering workflow.

Jan 2026 – Present

Bengaluru, India (Hybrid)

UnifiedAI

SDE Intern

- Wrote end-to-end and integration tests for core features, improving reliability and deployment confidence.
- Migrated **20M+** MSSQL records to MongoDB Time Series and built a real-time pipeline on **Docker**, **Kubernetes**, and **AWS ECS Fargate**.
- Configured deployment and networking workflows with **OpenFortiVPN** and containerized services for production ingestion systems.

Feb 2026 – May 2026

Bengaluru, India (Remote)

Undergraduate Researcher under Prof. Pawan Kumar Singh

Research Assistant

- Built a **multithreaded** audio pipeline and hybrid **CNN-BiLSTM** dysarthria detector in **Python**, improving throughput by **3x** and reaching **99.28%** accuracy.
- Optimized speech preprocessing and sequential feature extraction for high-throughput ML experiments.

Apr 2025 – Aug 2025

Jadavpur University, Kolkata

Polycab India Ltd.

SDE Intern

- Designed employee-management backends with granular **RBAC**, secure schemas, concurrent **Node.js** analytics services, unit tests, and structured logging.
- Improved internal API workflows and database access patterns for faster analytics and more reliable operational tooling.

Dec 2024 – Feb 2025

Mumbai, India

PROJECTS

Ops Smith | Next.js, Express, BullMQ, Prometheus, ChromaDB

- Built an autonomous SRE platform for service monitoring, anomaly detection, root-cause analysis, and AI-driven auto-patching.
- Orchestrated **Prometheus** probes, **BullMQ/Redis** workers, **RAG** retrieval, **SuperPlane** workflows, rollback, and GitHub PR generation.
- Implemented a patch lifecycle that indexes code with **ChromaDB**, generates fixes, validates service health, and reverts unsafe changes.
- Designed a real-time dashboard for metrics, AI activity, incidents, and patch/PR status across monitored services.

AskVault | Python, FastAPI, Redis, Docker, AsyncIO

- Designed a **distributed document-processing system** with **FastAPI**, **Redis**, **Docker**, **AsyncIO**, and multithreaded ingestion pipelines.
- Built a production-facing **RAG** Q&A workflow with cache-backed state, asynchronous indexing, and low-latency retrieval paths.
- Containerized ingestion and retrieval services for reproducible deployment and parallel document search workflows.

Fanshow | Node.js, Redis Pub/Sub, Event-Driven Architecture

- Architected an **event-driven microservices** backend with **Redis Pub/Sub** and **O(log n)** priority queues for **500+** concurrent booking requests.
- Optimized queue coordination and consistency handling for bursty ticket-booking traffic under high concurrency.

Ecox | Node.js, PostgreSQL, WebSockets, Distributed Design

- Built real-time backend APIs with **WebSockets** and optimized **PostgreSQL** queries, reducing latency by **40%** under load.
- Applied modular service boundaries and schema optimizations to support reliable real-time user interactions.

SKILLS

Languages: Solidity, Python, C/C++, TypeScript, JavaScript, SQL

Core Concepts: Distributed Systems, Blockchain, Concurrency, Microservices, gRPC, System Design, DeFi

Technologies: Docker, Kubernetes, AWS, GCP, Terraform, Kafka, Redis, PostgreSQL, MongoDB, Linux

ACHIEVEMENTS

IMC Trading Prosperity 4: Ranked **16th nationally** and **143rd internationally** among **18,000+** teams worldwide; **top 0.79%** globally.

LeetCode: **1879** contest rating with **Knight** rank.

Codeforces: **1457** rating, demonstrating strong algorithmic problem-solving and implementation speed.

Open Source: Participated in **GSSoC 2025** and **Hacktoberfest 2024**.

Hackathons: **Winner** at **SparkForge 2025**; **Top 5** at **IIT Delhi** and **IIT KGP Hackathons**.
